

January 13, 2023

Dear neighbours,

The purpose of this note is to let you know about some exterior work taking place next week on the construction site of the Speakman Drive long-term care home property.

As part of the installation of the generators on site, we will be starting up the generators during the week of January 16, from Monday through to Thursday. This step is required as part of the installation process.

**What to expect:**

- Increased activity on the south side of the site
- Noise from the generators

**Steps being taken to mitigate the noise:**

- Starting one generator at a time, not all three at once
- Running the generators from approximately 10am – 3pm
- Generators will not be run consecutively – but will be turned on to conduct specific tasks required as part of the installation process.

We anticipate that the generators will run at a louder level during the testing phase as we work to optimize the technical standards, than when they are fully installed and operational.

If you have any questions or concerns, please send an email to [public.affairs@thp.ca](mailto:public.affairs@thp.ca). For any immediate concerns about an on-site construction issue, please call 416.594.2196. This line is monitored line with after-hours contact information.

Sincerely,  
-Trillium Health Partners
