Subject: Speakman Drive Long-Term Care Homes – Concrete Pouring

Dear residents,

As a follow up to our previous notices about the concrete pours taking place at the Speakman Drive long-term care home property, the purpose of this notice is to confirm that **the next round of concrete pours is scheduled to begin on Friday, April 22**, depending on the weather. These pours will take place in stages, on levels three up to the roof of both buildings. There will be a total of seven pours in the east building (closest to neighbours), and 15 pours in the west building. It is anticipated that all pours will be completed in July 2022.

As a reminder, due to the nature of this work, the concrete pours must be completed as a continuous operation, which can take up to 24 hours in total. The team at EllisDon begins the work at 7am, in a continuous sequence of steps. The concrete pour is completed and then all mechanical equipment, concrete delivery trucks and pump trucks leave the site by 7pm. The curing and finishing work continues and is completed by about 4am.

EllisDon will continue to make efforts to minimize the impact to neighbours. All lights will be directed away from residential homes, although there may be minor noise from light towers and finishing equipment. These concrete pours do not require cutting, which will reduce the noise impact.

Questions?

As always, we welcome all of your questions and comments, and are committed to working together. We will continue to share information with you as it becomes available. All information and updates will be shared via email, so if you have any neighbours who have not signed up for our mailing list yet, please let them know to contact us public.affairs@thp.ca. If you have real-time concerns about an on-site issue, please call 416-594-2196. This is a monitored line with after-hours contact information.

Sincerely,

- Trillium Health Partners
